

ADVANCES IN SOLID AND HAZARDOUS WASTE MANAGEMENT

Editor:

Sudha Goel, Department of Civil Engineering, Indian Institute of Technology Kharagpur, Kharagpur, India

About the Book:

The book provides a large number of examples and case studies of innovative applications and tools in the growing area of research and development in waste management. The book discusses solid waste management which now includes not just municipal waste but also nuclear waste, electronic waste, waste from thermal power plants, and industrial hazardous waste. Each of these wastes has been addressed in separate sections and individual chapters have been written by practicing experts in their respective fields of specialization in the hope that readers will be able to understand and apply these principles and practices in their own endeavours

Co-Published with Springer and sold and distributed by them in all countries excepting SAARC region.
