

## **About the Book:-**

This book offers perspectives on more productive, sustainable and resilient modes of agriculture. The chapters highlight successful, evidence-based local and regional practices across the globe that are resulting in more sustainable and viable methods of farming, particularly important within the context of weather variability and climate change. The efficient use of weather and climate services for agricultural applications is fundamental to these efforts. In the past, weather and climate services have not been used to their fullest potential for developing sustainable agriculture. But now more than ever, as this book documents, agrometeorology is an essential tool for current and future food production and security around the world. This book offers strategic recommendations for strengthening the role and availability of agrometeorological services around the globe.

## **Contents**

- 1) Overview of Operational Agrometeorological Services in India
- 2) Agromet Services for Sustainable Cropping Systems
- 3) Spring Frost Risk in Orchards: Forecast and Protection Methods
- 4) Climate Field Schools for Supporting Food Security Programme in Indonesia
- 5) Agrometeorological Activities in Tanzania
- 6) Status and Future Scope to Enhance Agrometeorological Services in Bangladesh
- 7) Meeting Farmers' Needs for Agrometeorological Services: An Overview and Case Studies
- 8) Future Needs of Operational Agrometeorological Services in India
- 9) Impact of Weather on Poultry Farming
- 10) Impacts of Climate on the Livestock Sector
- 11) Monthly and Seasonal Forecast of Precipitation and Temperature over India for Agro-meteorological Applications
- 12) Managing Hazard-Related Risks to Agriculture in India
- 13) Climate Change and its Impact on Agriculture in India
- 14) Impact of Climate Change on Incidences of Pests in Crops
- 15) Pest and Disease Modeling for Operational Agromet Advisory Services
- 16) Development of Satellite Based Operational Agro-met Products for Value Added Agro-met Advisories
- 17) Water Management and Water Use efficiency in Agriculture
- 18) Challenges to Coping Strategies with Agrometeorological risks and Uncertainties in Africa
- 19) Strategies in Agricultural Practices Under Climate Variability and Climate Change in India
- 20) Agrometeorology –Needs, Approaches and Linkages for Rural Development
- 21) Impact of Weather and Climate on Plantation Crops in the Humid Tropics
